

Valvin V100B is an intelligent fill valve that detects and prevents toilet bowl overflows. The Valvin "Bowl Sensor" detects a high water level caused a blockage, and then automatically shuts off the water supply. The Valvin V100B contains the waste within the toilet bowl and avoids the cleanup and water damage that occurs when waste overflows all over the floor and beyond. The extent of damage can vary dramatically, from unsanitary cleanup and drying efforts, up to expensive repair and restoration of both structure and furnishings. With the Valvin V100B, no cleanup efforts are needed, simply plunge away the obstruction and resume normal operations.

Technical Specifications:

- Material: POM, ABS, PP, SS
- Cable material: Silicone
- Rubber material: EPDM
- Electronic components: Silicone sealed
- Electronic components are Rohs compliant
- Fill valve Inlet thread: G15/16"
- Fill valve cycles: 75,000+
- Adjustable height: 8-11"
- Water pressure: 2.18-232.06 psi
- Water filling rate: 1.24 gal/minute
- Battery: 9V (Not included)
- Battery life: 3 years
- Water proof labels
- UPC & cUPC Cert.
- Patented in US and China

Packaging Details:

- N.W./Master Carton (12 units): 10.32 lbs.
- G.W./Master Carton (12 units): 15.10 lbs.
- Master Carton Size: 18 7/8 x 14 1/8 x 11 3/4 in.
- Max Pallet Qty: 30 Cartons (360 units)
